Delhi

Professional Objective

Motivated 3rd-year Artificial Intelligence and Machine Learning Engineering student with a strong foundation in Python and hands-on experience building projects in hackathons. Passionate about applying AI, software development, and augmented reality to solve real-world problems in education and tourism.

Education

Panipat Institute of Engineering and Technology (PIET) | Panipat, Haryana

- B.Tech in Artificial Intelligence & Machine Learning (3rd Year)
- 1st Semester SGPA: 7.95
- 2nd Semester SGPA: 8.21
- 3rd Semester SGPA: 7.3
- Student ID/Roll No: 28240591

Technical Skills

- Programming Languages: Python (Proficient), C# (Intermediate), C (Basics), C++ (Basics)
- Technologies & Tools: Unity, AI/Machine Learning Fundamentals, Data Science Basics
- Core Competencies: Problem Solving, UI/UX & Logo Design, Team Collaboration

Projects & Hackathons

ShikshaSetu | AI-Powered EdTech Platform

- Engineered an AI-integrated educational website designed to support struggling students by generating personalized learning roadmaps.
- Developed interactive features including automated mock tests and a real-time progress tracker to enhance student engagement and improve academic performance.

AR Heritage Monument App | SIH 2025 Finalist & COER Manthan'25

- Developed an Augmented Reality (AR) application using Unity and C# to create immersive, interactive experiences of Indian heritage monuments, aimed at boosting local tourism.
- Iterated and upgraded the application across multiple hackathons, earning a Finalist nomination with Team XR-TRIBE at the Internal Smart India Hackathon.

Future Career Predictor | Hack KRMU 5.0

- Built a forward-looking EdTech website designed to forecast emerging job market trends and career opportunities over a 3-5 year horizon.
- Collaborated in a fast-paced environment to design a solution that helps students align their current studies and skill sets with future industry demands.

LogoLocha Design Competition | SKLZ TECT

- Competed in a logo branding and designing competition as part of Team "kid pham," showcasing creativity and design fundamentals.

Experience & Training

Data Science and Machine Learning Intern | the brainhub (Completed: August 25, 2025)

- Completed an intensive 45-day training program focused on the foundational concepts and theoretical frameworks of Machine Learning and Data Science.
- Gained exposure to core ML principles, including model evaluation, data processing, and algorithmic problem-solving.
- Earned a "Good" overall performance rating from the program directors for consistent engagement and successful completion of the coursework.
- Credentials: Certificate No. C01TBH250364 | Registration No. R01TBH2510093.
